Read the passage given below and answer the questions that follow based on it.

Foreign offices around the world have been taken by surprise by the dramatic **détente** in India-China relations. Narendra Modi and Xi Jinping have broken the Gordian knot after a four-year border standoff. The positions of both sides have been consistent for the past four years. Delhi's message to Beijing has been, let's go back to the way things were on the border before we can think about what can be done about the bigger picture of the relationship. China's framework is akin to a package where the border and all round normalisation are interlinked. It might seem that India's position has prevailed because China has indeed agreed to take the first step in restoring border stability. But a broader **détente** and normalcy is what China sought, and, the official statements from both sides after the Modi-Xi meeting leave no doubt that a process towards comprehensive normalisation has now commenced. Many have been surprised that China did not press home its advantages in the most contentious friction points of Depsang and Demchok. The PLA hardliners, it is believed, did not want to budge. So what explains China's flexibility? For one, Beijing found an opportunity to gain an advantage over the US, who is doing everything to unsettle not just its India ties but wrecking relations with several major non-western powers, almost simultaneously. Second, a traditional Chinese **geostrategy** since the 1950s of neutralising peripheral or secondary areas of threats to focus on primary security threats from the US in the Western Pacific shaped its decision. As for India's calculus, two big themes stand out. The US factor as a key geopolitical instrument for India's China challenge has not quite fulfilled the promise over the past decade. Even after 2020, the idea that the Ladakh crisis would open unprecedented economic and geopolitical opportunities to broaden the partnership with the US did not occur. The outbreak of multipolarity has thrown all previous calculations by the wayside. Since the Ukraine conflict, US global **geostrategy** has shifted to Eurasian containment. India's strategic autonomy or non-alignment is seen as a major obstacle in this new phase of countering a multipolar world order. The repercussions have been felt in US-India ties. Even in the Indo-Pacific, the US has doubled down on its core alliance partners in East Asia, with India's role becoming a more peripheral one insofar as core regional and continent-wide security questions are concerned. This further reinforced the worldview in Delhi that a major adjustment was necessary to safeguard a range of Indian interests and also to reposition India in a more advantageous position among the great powers. So the overall timing was apt because both India and China have discovered that, despite their bilateral

- Question No. 1

What was India's main condition for resuming normal relations with China?

Options :

1. Resolving trade issues
2. Restoring the border status quo
3. Allowing China to take control of the Ladakh region
4. Aligning foreign policies with the US
5. Strengthening military alliances

Answer : Restoring the border status quo

Rearrange the sentences to form a coherent paragraph and answer the questions that follow:

(A) Moreover, France has made substantial contributions to philosophy, literature, and the arts, with figures like Voltaire, Sartre, and Monet shaping intellectual and cultural movements.

(B) Despite these modern developments, France continues to honor its traditions, blending its historical roots with contemporary advancements.

(C) The country has been at the center of several significant historical events, including the French Revolution, which fundamentally altered the nation's political landscape.

(D) Paris, its capital, attracts millions of tourists annually, drawn by landmarks like the Eiffel Tower, Notre Dame Cathedral, and the Arc de Triomphe.

(E) France is renowned globally for its rich cultural heritage, from the masterpieces in the Louvre to its world-famous cuisine and fashion industry.

(F) In recent years, France has also emerged as a leader in climate action, actively pushing for policies to address global warming and environmental sustainability.

• Question No. 15

Which of the following should be the LAST sentence after rearrangement?

Options :

1. E
2. C
3. B
4. D
5. A

Answer : B

Direction:

Read the sentence to find out whether there is any grammatical or idiomatic error in it. The error, if any, will be in one part of the sentence. The letter of that part is the answer. If there is 'No error', the answer is (5). (Ignore errors of punctuation, if any).

• Question No. 16

Despite the recent market downturn, (1)/ many investors remain optimistic (2)/ in the potential growth of emerging markets (3)/ across the next decade.(4)

Options :

1. 1
2. 2
3. 3
4. 4
5. No error

Answer : 3

Direction:

Read the sentence to find out whether there is any grammatical or idiomatic error in it. The error, if any, will be in one part of the sentence. The letter of that part is the answer. If there is 'No error', the answer is (5). (Ignore errors of punctuation, if any).

- Question No. 17

Although he had prepared well (1)/ for the interview, (2)/ he could not answered (3)/ several of the technical questions (4)

Options :

1. 1
2. 2
3. 3
4. 4
5. No error

Answer : 3

- Question No. 20

The company's profits (1)/ have grown steadily (2)/ since it launched (3)/ the new product last year.(4)

Options :

1. 1
2. 2
3. 3
4. 4
5. No error

Answer : No error

Direction:

Choose the correct meaning of the idiom in bold:

- Question No. 21

"After months of struggling with the project, the team finally made significant progress and feels they are **out of the woods.**"

Options :

1. completed the project.
2. encountered a new problem.
3. overcome the difficult part of the situation.
4. still facing challenges ahead.
5. decided to abandon the project.

Answer : overcome the difficult part of the situation.

Direction:

Choose the correct meaning of the idiom in bold:

- Question No. 22

"The report had **more holes than Swiss cheese**, making it difficult to trust the conclusions drawn from it."

Options :

1. was very detailed and comprehensive.
2. had many flaws and lacked reliability.
3. was perfectly accurate and reliable.
4. was difficult to understand.
5. was written in a confusing manner.

Answer : had many flaws and lacked reliability.

Direction:

Choose the correct meaning of the idiom in bold:

- Question No. 23

"At first, the proposal seemed unrealistic, but it turned out to be a **blessing in disguise**."

Options :

1. A surprising problem
2. An unexpected benefit
3. A lost opportunity
4. A minor inconvenience
5. A foolish decision

Answer : An unexpected benefit

Direction:

Choose the correct meaning of the idiom in bold:

- Question No. 24

"She knew she was **biting off more than she could chew** when she accepted the new project."

Options :

1. Enjoying her work
2. Working without a break
3. Taking on too much
4. Refusing help from others

5. Refusing help from others

Answer : Taking on too much

Direction:

Choose the correct meaning of the idiom in bold:

- Question No. 25

"The politician tried to **pass the buck** when questioned about the scandal."

Options :

1. Accept responsibility
2. Shift the blame
3. Take quick action
4. Ignore the issue
5. Ask for a bribe

Answer : Shift the blame

Answer : 152

Direction:

Direction: A company organizes an annual evaluation of employees across its five departments: Research, Development, Finance, Marketing, and Operations. Each department has employees distributed among three experience levels: Junior, Mid-Level, and Senior. The total number of employees across all departments is 600. The following information is known about the distribution and experience levels of the employees in each department:

1. The Research department comprises 18% of the total employees, and within this department, the ratio of Junior to Mid-Level to Senior employees is 3:4:2.
2. The Development department has 22% of the company's total employees, with Junior employees making up 40%, Mid-Level employees 35%, and the rest Senior employees.
3. In the Finance department, which has 16% of the total employees, the Junior, Mid-Level, and Senior employees are in the ratio 2:3:1, respectively.
4. The Marketing department has 26% of the company's total employees, with Junior, Mid-Level, and Senior employees distributed in the ratio 5:4:3.
5. The Operations department includes the remaining employees, with 20% in the Junior level, 60% in the Mid-Level, and the remaining employees in the Senior level.

Answer the following questions based on the above data.

• Question No. 36

Calculate the number of Mid-Level employees in the Research department, and if 50% of them are selected for a training program, how many employees are selected from the Mid-Level of the Research department for this program?

Options :

1. 32
2. 24
3. 36
4. 45
5. None of these

Answer : 24

5. The Operations department includes the remaining employees, with 20% in the Junior level, 60% in the Mid-Level, and the remaining employees in the Senior level.

Answer the following questions based on the above data.

• Question No. 40

In the Operations department, calculate the total number of Mid-Level employees, and if each of these Mid-Level employees attends 5 workshops per month, what is the total number of workshops attended by all Mid-Level employees in the Operations department in a year?

Options :

1. 2160
2. 2800
3. 3440
4. 3888
5. None of these

Answer : 3888

• Question No. 41

A, B, and C started a business with a total investment of Rs. 8000, distributed in the ratio 1:4:3. After five months, A added Rs. n to his initial investment, while C withdrew Rs. n . If the total profit for the year was Rs. 5000 and A's share of the profit

was Rs. 2200, find the value of n.

Options :

1. 3540
2. 4320
3. 3680
4. 4740
5. None of these

Answer : 4320

• Question No. 42

A shopkeeper allows a discount of 10% on the marked price and still makes a profit of 20%. If the marked price of the article is Rs. 1,500, find the cost price of the article.

Options :

1. Rs. 1,125
2. Rs. 1,200
3. Rs. 1,250
4. Rs. 1,350
5. None of these

Answer : Rs. 1,125

• Question No. 43

The simple interest on a sum of Rs. $(6x + 100)$ for 4 years at 10% per annum is Rs. 1,200. Find the value of x.

Options :

1. 525
2. 530
3. 435
4. 440

5. None of these

Answer : None of these

• Question No. 44

A vessel contains 120 liters of a mixture of milk and water, with 75% of it being milk. If 30 liters of this mixture is replaced by 30 liters of water, what is the new percentage of milk in the mixture?

Options :

1. 56.25%
2. 60%
3. 65.55%
4. 70%
5. None of these

Answer : 56.25%

• Question No. 45

A person invests Rs.15,000 in two different schemes. The first scheme offers simple interest at 10% per annum, and the second scheme offers simple interest at 12% per annum. The total interest earned in 2 years from both schemes is Rs.3300. Find the amount invested in the second scheme.

Options :

1. Rs.7500
2. Rs.8000
3. Rs.9000
4. Rs.10,000
5. None of these

Answer : Rs.7500

• Question No. 46

A shopkeeper sells two articles for Rs.3000 each. On one, he gains 25%, and on the other, he loses 20%. What is the overall percentage gain or loss?

Options :

1. 2.44% loss
2. 3% gain
3. 4.5% loss
4. 5% gain
5. No gain, no loss

Answer : 2.44% loss

• Question No. 47

A and B together can complete a work in 20 days. After working together for 8 days, B leaves, and A completes the remaining work in 16 more days. In how many days can B alone complete the entire work?

Options :

1. 30 days
2. 40 days
3. 50 days
4. 80 days
5. None of these

Answer : 80 days

• Question No. 48

Two pipes A and B are opened together to fill a tank. Both the pipes fill the tank in time "x". If A separately takes 8 minute more time than "x" to fill the tank and B takes 50 minute more time than "x" to fill the tank, then find the value of x ?

Options :

1. 36 minutes
2. 40 minutes

3. 21 minutes

4. 14 minutes

5. 35 minutes

Answer : 36 minutes

• Question No. 49

The compound interest on a certain sum for 2 years at 10% per annum is Rs. $(x+420)$. The simple interest on the same sum at the same rate for the same time is Rs. 600. Find the value of x .

Options :

1. 200

2. 230

3. 240

4. 210

5. None of these

Answer : 210

• Question No. 50

A merchant sold an article at 20% profit and bought another article with the proceeds. He then sold the second article at a 25% profit. If the original cost price was ₹5,000, what was the final selling price?

Options :

1. ₹7,500

2. ₹8,000

3. ₹8,250

4. ₹9,000

5. ₹9,250

Answer : ₹7,500

Direction:

Direction: A manufacturing company produces three products: A, B, and C. The following table summarizes the production details for each product over a period of 5 months, including the cost price (CP), selling price (SP), and units produced each month.

Product	Month 1 (Units)	Month 2 (Units)	Month 3 (Units)	Month 4 (Units)	Month 5 (Units)	Cost Price (CP)	Selling Price (SP)
A	100	120	130	110	150	₹200	₹300
B	80	90	70	60	100	₹250	₹350
C	150	160	180	200	170	₹300	₹500

• Question No. 51

Calculate the total units produced for each product over the 5 months. Based on this production data, determine the total cost price and total selling price for each product. What is the overall profit or loss for the company?

Options :

1. Total Profit ₹320,000
2. Total Profit ₹273,000
3. Total Profit ₹280,000
4. Total Profit ₹300,000
5. Total Loss ₹210,000

Answer : Total Profit ₹273,000

Direction:

Direction: A manufacturing company produces three products: A, B, and C. The following table summarizes the production details for each product over a period of 5 months, including the cost price (CP), selling price (SP), and units produced each month.

Product	Month 1 (Units)	Month 2 (Units)	Month 3 (Units)	Month 4 (Units)	Month 5 (Units)	Cost Price (CP)	Selling Price (SP)
A	100	120	130	110	150	₹200	₹300

- Question No. 56

1460, 1443, 1430, 1415, 1404, 1395

Options :

1. 1460
2. 1404
3. 1430
4. 1395
5. None of these

Answer : 1430

Direction:

Direction: Find the wrong number in given number series.

- Question No. 57

169, 224, 293, 385, 497, 629

Options :

1. 385
2. 224
3. 497
4. 629
5. None of these

Answer : 224

Direction:

Direction: Find the wrong number in given number series.

- Question No. 58

1080, 1058, 1016, 934, 772, 440

Options :

1. 934
2. 440
3. 1058
4. 1016
5. None of these

Answer : 440

Direction:

Direction: Find the wrong number in given number series.

• Question No. 59

16, 36, 128, 768, 6144, 61440

Options :

1. 6144
2. 768
3. 36
4. 128
5. None of these

Answer : 36

Direction:

Direction: Find the wrong number in given number series.

• Question No. 60

1990, 1877, 1794, 1711, 1638

Options :

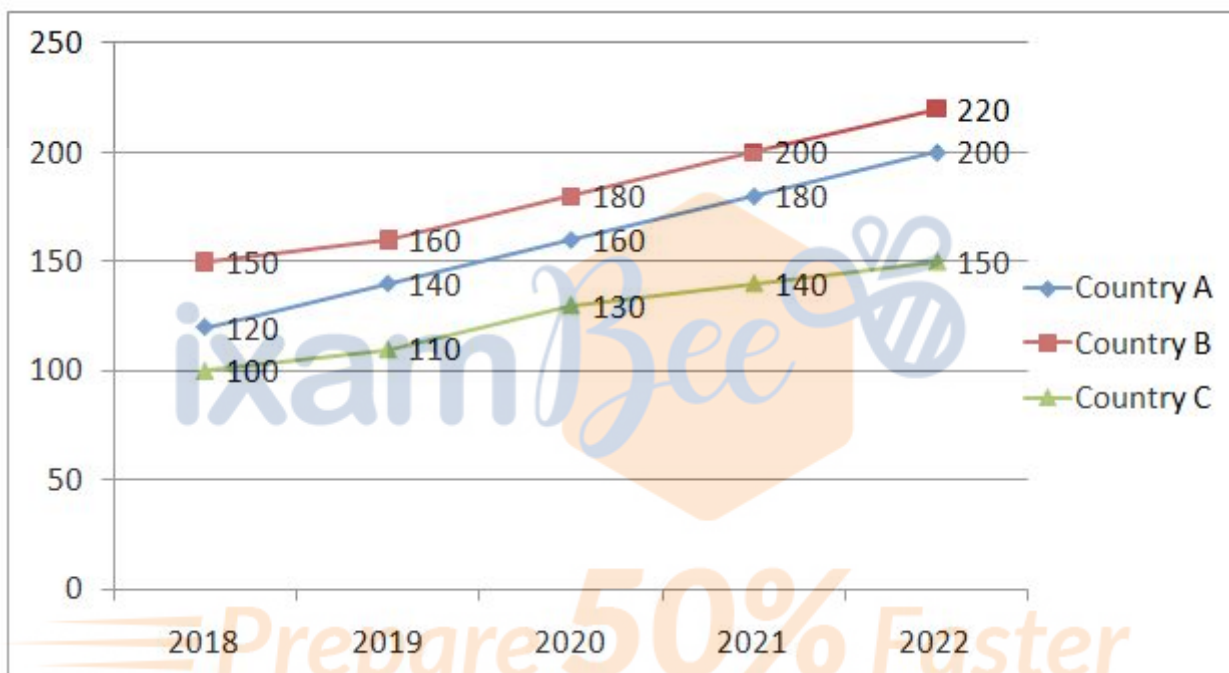

1. 1638
2. 1877

- 3. 1794
- 4. 1711
- 5. None of these

Answer : 1877

Direction:

Direction: Number of Medals Won by Players from Three Countries (2018-2022)

• Question No. 61

Calculate the overall percentage increase in the number of medals won by players from Country A from 2018 to 2022. Then, compare it with the overall percentage increase for Country C over the same period. What is the percentage difference in their increases?

Options :

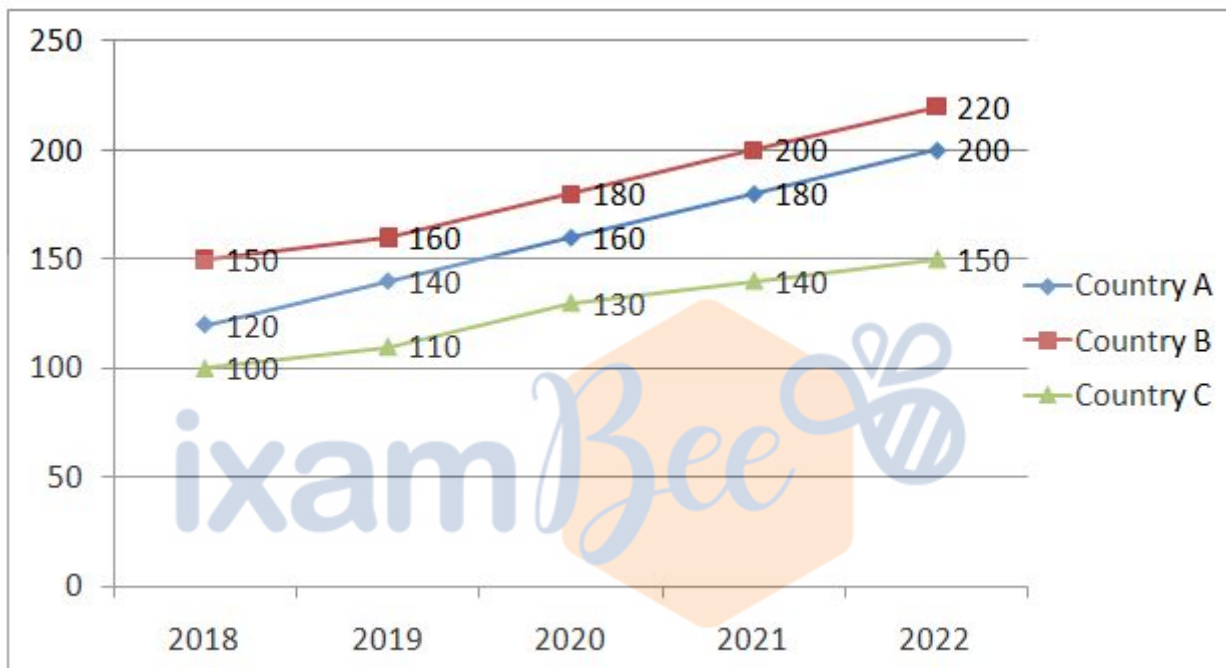

- 1. 10%
- 2. 15.5%
- 3. 20%
- 4. 16.67%

5. None of these

Answer : 16.67%

Direction:

Direction: Number of Medals Won by Players from Three Countries (2018-2022)

• Question No. 62

Find the average number of medals won by players from each country over the five years. What is the ratio of the average number of medals won by Country B to the average won by Country A?

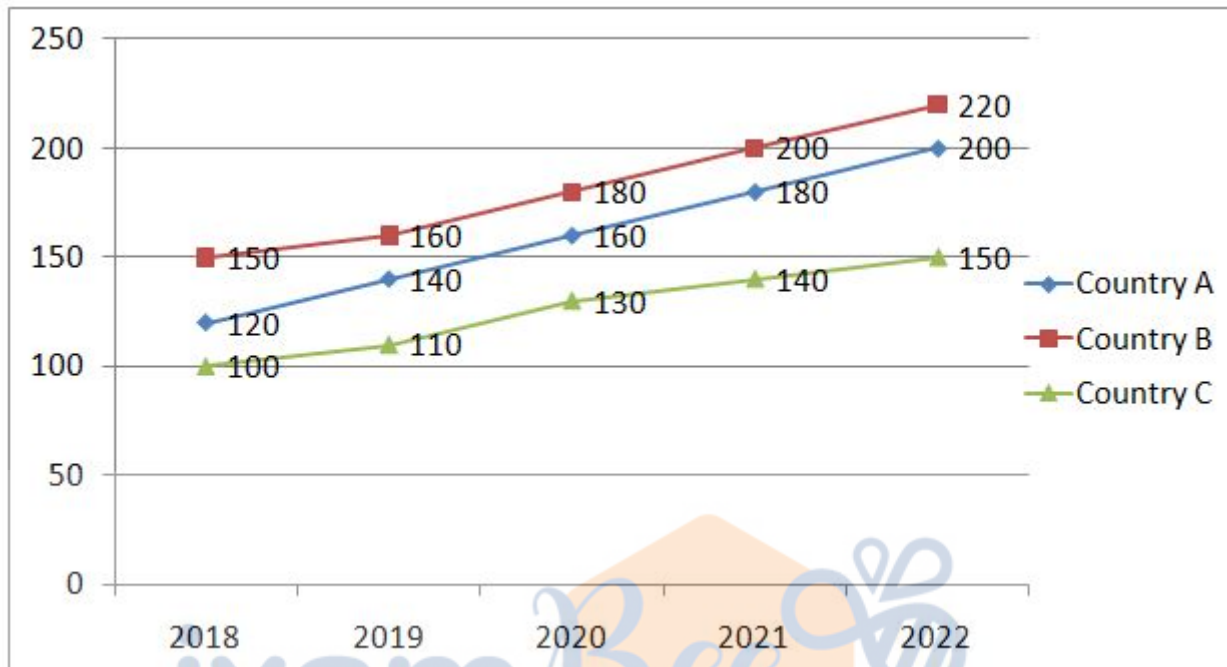

Options :

1. 17:14
2. 119:40
3. 91:80
4. 23:21
5. None of these

Answer : 91:80

Direction:

Direction: Number of Medals Won by Players from Three Countries (2018-2022)

• Question No. 63

In 2020, the number of medals won by players from Country B was what percentage of the total number of medals won by players from all three countries in that year? Additionally, find the percentage difference between this value and the percentage of medals won by players from Country A in the same year.

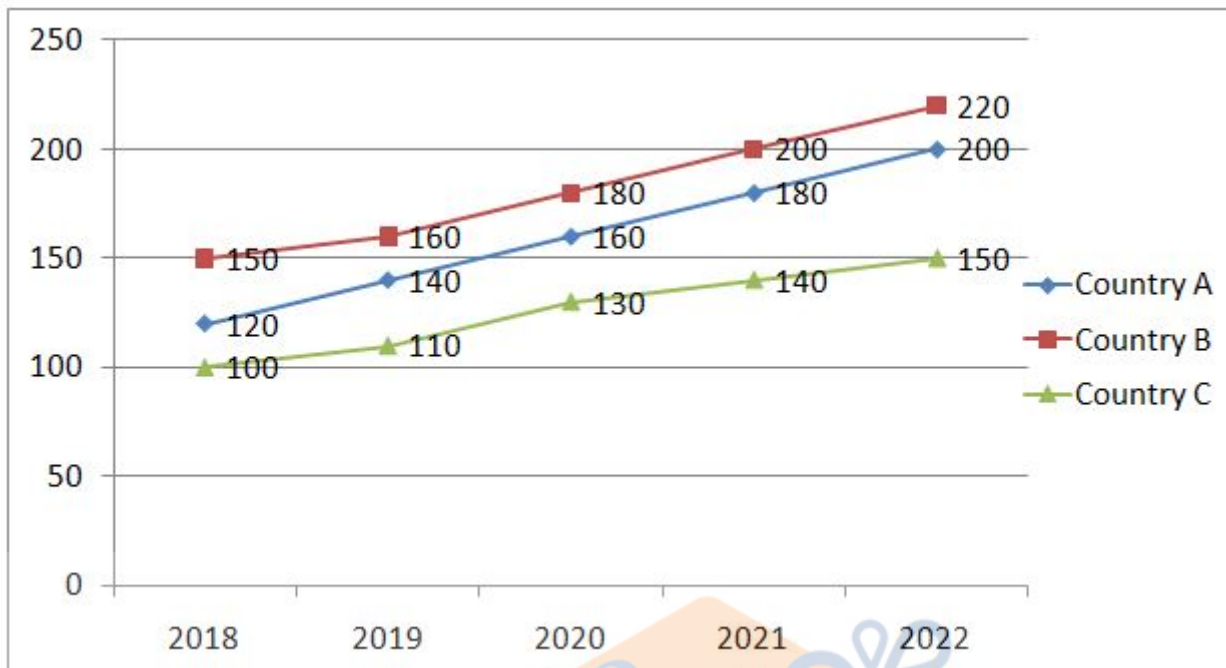

Options :

1. 38.3%, 4.26%
2. 33.33%, 5.62%
3. 30.5%, 4.25%
4. 25.45%, 7.21%
5. None of these

Answer : 38.3%, 4.26%

Direction:

Direction: Number of Medals Won by Players from Three Countries (2018-2022)

• Question No. 64

Calculate the cumulative number of medals won by players from all three countries over the five years. If the number of medals won by Country A had been 20% higher each year, how many additional medals would Country A have won by 2022?

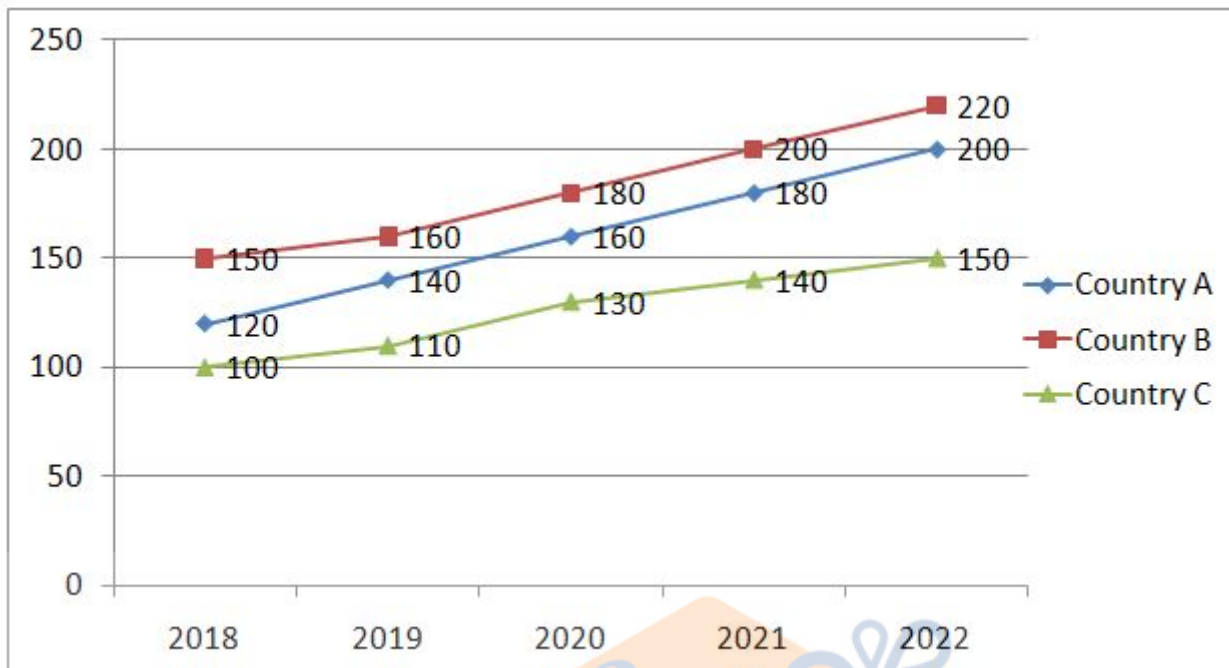

Options :

1. 130
2. 140
3. 150
4. 160
5. None of these

Answer : 160

Direction:

Direction: Number of Medals Won by Players from Three Countries (2018-2022)

• Question No. 65

For each year, the number of medals won by players increased for all three countries. Calculate the overall growth rate of the total medals won by all three countries from 2018 to 2022.

Options :

1. 60.5
2. 54.05%
3. 63.5
4. 65.06
5. None of these

Answer : 54.05%

Direction:

Study the following information carefully and answer the below questions

Six boxes- A1, B1, C1, D1, E1, and F1 are kept one above another in the stack. The lowermost box is numbered as one and the topmost box is numbered as six. The boxes are of different colors – Red, Blue, Yellow, White, Green, and Pink. All the information is not necessarily in the same order.

A1 is kept two boxes below the green box. A1 is not kept in the lowermost position. The number of boxes kept above the green box is the same as the number of boxes kept below the white box. B1 is kept immediately below the box which is kept three boxes above the white box. The red box is kept immediately above the Pink box. A1 is neither Red nor Pink. E1 is kept two boxes above the yellow box. E1 is not Green. D1 is neither Green nor yellow. F1 is kept above box C1.

- Question No. 66

Which of the following box is Pink in color?

Options :

1. The box which is kept two boxes above F1
2. The box which is kept immediately below E1
3. Box C1
4. Box B1
5. Box F1

Answer : Box B1

Direction:

Study the following information carefully and answer the below questions

• Question No. 75

What does 'kiw' stand for?

Options :

1. Happiness
2. Other
3. Brian
4. Either (1) or (3)
5. Either (1) or (2)

Answer : Either (1) or (2)

Direction:

Study the following information carefully and answer the below questions.

Eight persons are sitting around the circular table. Some of them facing inside and some of them facing outside the table.

No two persons facing the same direction sits adjacent to each other. G and H are sitting immediate left to each other.

Two persons sit between H and the person who sits opposite to E. F sits three places away from B who sits two places away from E. A faces the person who sits two places away from C. D and C are not immediate neighbours.

• Question No. 76

Who sits fifth to the left of D?

Options :

1. E
2. G
3. H

- 4. C
- 5. None of these

Answer : C

Direction:

Study the following information carefully and answer the below questions.

Eight persons are sitting around the circular table. Some of them facing inside and some of them facing outside the table. No two persons facing the same direction sits adjacent to each other. G and H are sitting immediate left to each other. Two persons sit between H and the person who sits opposite to E. F sits three places away from B who sits two places away from E. A faces the person who sits two places away from C. D and C are not immediate neighbours.

- Question No. 77

How many persons sit between G and the person opposite to D when counted from the right of G?

Options :

- 1. One
- 2. Two
- 3. Three
- 4. Four
- 5. Other than the given option

Answer : Other than the given option

Direction:

Study the following information carefully and answer the below questions.

Eight persons are sitting around the circular table. Some of them facing inside and some of them facing outside the table. No two persons facing the same direction sits adjacent to each other. G and H are sitting immediate left to each other. Two persons sit between H and the person who sits opposite to E. F sits three places away from B who sits two places away from E. A faces the person who sits two places away from C. D and C are not immediate neighbours.

- Question No. 78

Which of the following given statement is/are true?

- I. G sits third to the right of the person who faces D

II. A faces the person who sits immediate left of E

III. B sits opposite to the person who is third left from C

Options :

1. Only III
2. Both II and III
3. Both I and III
4. All I, II and III
5. None of these

Answer : Only III

Direction:

Study the following information carefully and answer the below questions.

Eight persons are sitting around the circular table. Some of them facing inside and some of them facing outside the table. No two persons facing the same direction sits adjacent to each other. G and H are sitting immediate left to each other. Two persons sit between H and the person who sits opposite to E. F sits three places away from B who sits two places away from E. A faces the person who sits two places away from C. D and C are not immediate neighbours.

• Question No. 79

Four of the following five are alike in a certain way and hence form the group. Which is the one that does not belong to the group?

Options :

1. D
2. B
3. E
4. A
5. G

Answer : A

Direction:

Study the following information carefully and answer the below questions.

Eight persons are sitting around the circular table. Some of them facing inside and some of them facing outside the table. No two persons facing the same direction sits adjacent to each other. G and H are sitting immediate left to each other. Two persons sit between H and the person who sits opposite to E. F sits three places away from B who sits two places away from E. A faces the person who sits two places away from C. D and C are not immediate neighbours.

- Question No. 80

In which of the following statement the third person sits exactly between the first and the second person in the following arrangement?

I. D H B

II. C F H

III. E G A

Options :

1. Only I
2. Only II
3. Only II and III
4. All I, II and III
5. None of these

Answer : Only II and III

Direction:

Study the following information carefully and answer the below questions

Six persons- A, B, C, D, E, and F are sitting in the linear row facing the north. They are using different brand cars- Mahindra, Honda, Skoda, Renault, Nissan, and Toyota but not necessarily in the same order.

The one who uses Renault sits third to the left of the one who sits second to the right of A. Only two persons are sitting between A and C. The number of persons sitting to the left of C is the same as to the right of the one who uses Mahindra. Only two persons sit between the one who uses

Mahindra and D. E sits third to the left of the one who uses Skoda. Neither D nor B uses Skoda. The one who uses Nissan sits immediate left of the one who uses Toyota. A does not use Honda.

- Question No. 81

Who among the following sits second to the left of C?

Options :

1. The one who uses Toyota
2. The one who uses Skoda
3. The one who uses Renault
4. B
5. A

Answer : The one who uses Toyota

Direction:

Study the following information carefully and answer the below questions

Z is the grandson of C, who is the mother of D. B has only two children. A is a female member of the family. E is of the same generation as Y. D has no siblings.

- Question No. 87

How many male members are there in the family?

Options :

- 1. 3

- 2. 4
- 3. 5
- 4. 2
- 5. More than five

Answer : 4

Direction:

Study the following information carefully and answer the questions given below.

In a family, there are seven persons and four generations. D is married to the only daughter of B, who is the only son of A. Y is the brother-in-law of D who has only one child. Z is the grandson of C, who is the mother of D. B has only two children. A is a female member of the family. E is of the same generation as Y. D has no siblings.

- Question No. 88

How is A related to Y?

Options :

- 1. Grandson
- 2. Granddaughter
- 3. Grandfather
- 4. Grandmother
- 5. None of these

Answer : Grandmother

- Question No. 89

Four of the following five letter clusters are alike in a certain manner and one is different. Select the one which is different.

Options :

- 1. EGC
- 2. VXB
- 3. JLH
- 4. SUQ

5. YAW

Answer : VXB

• Question No. 90

Four of the following five are alike in a certain way and so form a group. Which is the one that does not belong to that group?

Options :

1. CAD
2. FDG
3. DBE
4. IGK
5. LJM

Answer : IGK

Direction:

Read the directions carefully and answer the following questions.

Seven friends Krunal, Rohit, Dev, Hitesh, Ram, Anay, and Amar, visited to seven different cities among Lucknow, Pune, Kolkata, Hyderabad, Jaipur, Nashik, and Mumbai, in seven different months, January, March, April, June, August, October and December on the same day of the same week of year 2024.

Dev visited Lucknow in a month having 30 days. Two people visited between Dev and Anay, who visited after Dev.

Mumbai was visited before Jaipur, which was not visited by Anay. No one visited Nashik in October. Neither Pune nor

Nashik was visited in August. Amar visited Kolkata two months after Ram. Ram does not visit in June. Krunal visited

Hyderabad but not in April or October. Rohit visited four months before the person, who visited Nashik.

• Question No. 91

Find the incorrect match.

Options :

1. Ram – Mumbai

2. Hitesh – Nashik
3. Krunal – Jaipur
4. Amar – Kolkata
5. Dev – Lucknow

Answer : Krunal – Jaipur

Direction:

Read the directions carefully and answer the following questions.
